

U N	<b>G o a l</b>	17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development
	<b>T a r g e t</b>	17.7 Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms, including on concessional and preferential terms, as mutually agreed
	<b>I n d i c a t o r</b>	17.7.1 Total amount of funding for developing countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies

## I. Global indicator

〈Type 4〉

<b>Indicator</b>	Total amount of funding for developing countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies
<b>Definition</b>	<p>Environmentally Sound Technologies (ESTs) are technologies that have the potential for significantly improved environmental performance relative to other technologies.</p> <p>ESTs protect the environment, are less polluting, use resources in a sustainable manner, recycle more of their wastes and products. ESTs are not just individual technologies. They can also be defined as total systems that include know-how, procedures, goods and services, and equipment, as well as organizational and managerial procedures for promoting environmental sustainability.</p> <p>Any attempt to provide an assessment of investment into ESTs on either a global or national level must incorporate ways to track funding flows into both hard and soft technologies.</p>
