

U N	G o a l	7. Ensure access to affordable, reliable, sustainable and modern energy for all
	T a r g e t	7.b By 2030, expand infrastructure and upgrade technology for supplying modern and sustainable energy services for all in developing countries, in particular least developed countries, small island developing States and landlocked developing countries, in accordance with their respective programmes of support
	I n d i c a t o r	7.b.1 Installed renewable energy- generating capacity in developing countries (in Watts per capita)

I. Global indicator

〈Type 4〉

Indicator	Installed renewable energy- generating capacity in developing countries (in Watts per capita)
Definition	<p>The installed capacity of power plants that generate electricity from renewable energy sources divided by the total population of a country.</p> <p>Capacity is defined as the net maximum electrical capacity installed at the year-end and renewable energy sources are as defined in the IRENA Statute.</p> <p>The IRENA Statute defines renewable energy to include energy from the following sources: hydropower, marine energy (ocean, tidal and wave energy), wind energy, solar energy (photovoltaic and thermal energy), bioenergy, and geothermal energy.</p>
