U N	**G o a l**	**10. Reduce inequality within and among countries**
	T a r g e t	**10.7 Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies**
	Indicator	**10.7.4 Proportion of the polulation who are refugees, by country of origin**

I. National indicator 〈Type 3〉

Indicator	Population who filed refugee applications or are recognized as refugees, by country of origin
Definition	The term "refugee" means a foreigner who is unable or does not desire to receive protection from the nation of his or her nationality in well-grounded fear that he or she is likely to be persecuted based on race, religion, nationality, the status of a member of a specific social group, or political opinion, or a stateless foreigner who is unable or does not desire to return to the nation in which he or she resided before entering the Republic of Korea in such fear.
Calculation method	Number of people who filed refugee applications and who are recognized as refugees, by year (segregated by sex, country of origin, and reason)
Unit	Number of cases

II. National indicator's source

Data sources	▌Source: Korea Immigration Service Statistics ▌Collection method: Administrative data (statistics from the immigration information system and relevant departments)
Calendar	▌Frequency: Monthly and annually (as of Dec 31 or annually from Jan 1 to Dec 31) ▌Release: Monthly reports - 2-3 months after the reference month, annual reports - June in the following year
Organizations	Immigration Information Division(Tel. 02-2110-4094), Department of Justice
Related International Agency	N/A

III. Comparison with UN SDG indicator

① Indicator		② Definition		③ Data value	
Same	**Different**	Same	**Different**	Same	**Different**

Note	▌The UN indicator is defined as the total count of population who have been recognized as refugees as a proportion of the total population of their country of origin, expressed per 100,000 population, which is aggregated from administrative data on refugee status determination in each country or directly registered by the UN. The ratio is calculated by dividing the number of refugees from the country of origin at the end of the year by end-year population in country of origin plus the number of refugees by country of origin at end-year. ▌The national indicator is defined as the proportion of international residents in Korea who are recognized as refugees or who filed refugee applications.
